DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I, Figures 1-6 (appears to read on claims 4-9), drawn to a method of manufacturing a display device wherein the fixed substrate does not have an electrode formed thereon.

Species II, Figures 7A-7C (appears to read on claims 10-15), drawn to a method of manufacturing a display device wherein the fixed substrate has an electrode formed thereon.

Species III, Figures 8A-8C (does not appear to read on any of the claims), drawn to a method of manufacturing a display device wherein a plurality of stripe-shaped anodes are formed on the insulating layer.

If Species I is elected a further sub-species election is required:

Species I-A, Figures 1-3 (appears to read on claims 4-6), where openings are not formed in the peeling or insulating layer.

Species I-B, Figures 4-6 (appears to read on claims 7-9), where openings are formed in the peeling or insulating layer.

2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-3 are generic.

Art Unit: 1733

3. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

4. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

5. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. A telephone call was made to Mr. Scott Harris on 9/11/02 to request an oral election to the above restriction requirement, but the examiner was unable to reach him. Rejoinder of some of all of the groups will be considered upon the indication of allowable subject matter depending on the basis thereof.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1733

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to **John L. Goff** whose telephone number is **703-305-7481**. The examiner can normally be reached on M-Th (8 - 5) and alternate Fridays.
